

Industrial High Pressure Ventilation Fan

This high-pressure industrial ventilator fan is designed for efficient air movement in demanding environments. Featuring a robust construction and a powerful motor, it delivers high airflow and static pressure.

Overview

Industrial High-Performance Ventilation

This industrial high-pressure ventilation fan is engineered for demanding environments requiring efficient air movement and cooling. Utilizing advanced technology, the unit features ultra-low noise operation and supports frequency conversion for precise control. With a robust design, it is suitable for anti-corrosion applications and can be adapted to meet various international voltage standards.

Performance Metrics

Maximum Pressure

100 KPA
Max Pressure

Power Range

90W to 25kW

Technical Specifications

Noise Level

Ultra-low mute

Key Features

Frequency conversion, Anti-corrosion, High pressure

Compatibility

Multi-voltage support for international standards
