

Industrial High-Velocity Drum Fan

This high-velocity drum fan is designed for industrial and commercial environments. It features a heavy-duty steel frame, adjustable tilt, and multi-speed settings for customized cooling.

Product Overview

Industrial High-Velocity Drum Fan

The APK60-D1 is a high-velocity drum fan engineered specifically for demanding industrial and commercial environments. Built with a heavy-duty steel frame and a durable powder-coated finish, it is designed to withstand rigorous daily use in warehouses, factories, and workshops. With its dynamically balanced blade system and powerful motor, this unit delivers consistent, high-volume airflow while maintaining minimal vibration levels.

Technical Specifications

Airflow Control	Multi-speed settings with adjustable tilt for directional control
Construction Material	Heavy-duty steel with powder-coated finish
Blade System	Dynamically balanced for reduced vibration

Features & Safety

Safety Features

Wire mesh grill • Contact protection

Portability	Integrated wheels, Carry handle
-------------	---------------------------------

Usage

Ideal Applications

- Warehouses
- Factories
- Workshops
- Large open spaces
