

Industrial High-Velocity Electric Fan

This high-velocity electric fan is designed for industrial and commercial applications. It features adjustable speed settings and a tiltable head, providing powerful airflow for ventilation and cooling in warehouses, workshops, and large indoor spaces.

Product Overview

Industrial High-Velocity Performance

This high-velocity electric fan is engineered for demanding environments, including industrial workshops, warehouses, and mining establishments. Featuring a durable metal construction and three adjustable speed settings, it provides robust airflow to combat high temperatures and ensure effective air circulation. The versatile design supports both desk and floor placement, with an adjustable tilt head for precise directional cooling.

Technical Specifications

Adjustability

- Up and down adjustable tilt
- Desk or floor usage

Available Sizes

16 inch, 18 inch

Velocity Modulations

3 gears

Blade Count

3

Compliance & Quality

Certifications

CE • GS • ROHS • EMC • LVD
