

# Industrial High-Velocity Fan

This industrial-grade electric fan is designed for high-volume air circulation in large spaces. It features adjustable speed settings for customized comfort.

## ADDITIONAL IMAGES

## Product Overview

### Industrial High-Velocity Performance

This industrial high-velocity fan features an optimized blade structure made from die-cast aluminum, delivering 1.5 to 2 times greater air volume than comparable market models. Engineered with a cold-rolled silicon steel motor and copper enameled wiring, it ensures consistent operation with a low-temperature rise profile. Designed for durability and versatility, this fan provides efficient cooling for factories, workshops, and large warehouse environments.

## Technical Specifications

### Blade Options

- Two-blade option
- Three-blade option

Blade Material	Die-casting aluminum
Speed Settings	3
Temperature Rise Design	50 K

## Features

Key Features	Low Noise, Overload Capacity, Adjustable Oscillation, High Air Volume
--------------	---

## Application

### Suitable Environments

Factories • Workshops • Warehouses
