

Industrial High-Velocity Ventilation Fan

This industrial fan provides high-velocity air circulation in large spaces. Its robust metal frame houses a powerful motor and three blades, with adjustable tilt for directional cooling.

Overview

Industrial High-Velocity Ventilation

This high-velocity industrial and commercial ventilation fan is specifically engineered for efficient air circulation in large-scale environments. Built with a robust metal frame and a powerful motor, it delivers maximum airflow to warehouses, factories, and workshops. The unit features an adjustable tilt mechanism, allowing for precise directional cooling to meet specific operational needs.

Technical Specifications

Number of Blades	3
Construction Material	Robust Metal

Features

Key Features	High-Velocity, Adjustable Tilt, Industrial Grade, Commercial Use
--------------	--

Applications

Suitable Environments

- Warehouses
- Factories
- Workshops
- Commercial Spaces
