

Industrial Humidifier Dehumidifier Unit

This industrial unit functions as both a humidifier and dehumidifier. It is designed for efficient moisture control in large spaces and is enclosed in a galvanized steel casing.

Product Overview

Industrial Climate Control

This industrial-grade unit provides versatile moisture management, featuring both humidification and dehumidification capabilities in a single system. Housed in a durable, corrosion-resistant galvanized steel casing, it is engineered for heavy-duty performance in large-scale commercial and industrial environments. The design prioritizes ease of maintenance with accessible panels and integrated control systems for precise humidity regulation.

Physical Construction

Casing Material	Galvanized Steel
Design Features	Corrosion Resistant, Industrial Grade, Rectangular Housing

Functional Capabilities

Core Functions

- Humidification
- Dehumidification

Control System	Yes
----------------	-----

Maintenance & Installation

Access Panel	Maintenance and filter replacement access
Duct Connections	Multiple circular intake and exhaust ports
