

Industrial Hydraulic Cylinder

This heavy-duty cylinder is designed for industrial applications. It features a telescoping body, square mounting plates, and a corrosion-resistant yellow finish.

Product Overview

Industrial Hydraulic Cylinder

This heavy-duty hydraulic cylinder is engineered for demanding industrial applications requiring reliable force and precise movement. Featuring a robust construction, it includes a square top plate and a reinforced base plate with four bolt holes for secure, stable mounting. The telescoping design allows for adjustable height, while the high-visibility, durable yellow finish ensures excellent corrosion resistance in harsh working environments.

Design & Construction

Surface Finish

Corrosion Resistant • High-Visibility Yellow

Key Features

- Heavy-duty industrial grade
- Square top plate
- Telescoping height adjustment
- Reinforced mounting base

Mounting Type

Square base plate with 4-bolt pattern

Cylinder Configuration

Telescoping
