

Industrial Infrared Radiant Heater

This industrial infrared radiant heater is designed for efficient and targeted heating in various industrial and commercial settings. The heater utilizes infrared technology to directly warm objects and people within its range, minimizing energy waste by not heating the air.

Product Overview

Industrial Infrared Radiant Heater

The LDHR017 industrial infrared radiant heater is designed for efficient, targeted heating in demanding industrial and commercial environments. By utilizing advanced infrared technology, it warms objects and people directly rather than heating the air, which significantly minimizes energy waste. Built with a robust housing and an IP65 rating, this unit is engineered to withstand wet and dusty conditions while offering reliable, cost-effective performance.

Technical Specifications

Certifications	CE, GS, ROHS, EMC, ETL, cETL
IP Rating	IP65 (Dust tight and water resistant)

Design & Features

Key Features

- Extra reflector for higher heating efficiency
- Easy Fitting System for simple lamp replacement
- Gold coated lamp (HELEN technology)
- UV-free operation for safety

Recommended Applications

Warehouses • Factories • Workshops • Outdoor Areas
