

Industrial Internal Combustion Engine

This high-performance engine is designed for various industrial applications. It features a direct injection system for improved fuel efficiency and reduced emissions.

Overview

Industrial Engine Overview

This high-performance internal combustion engine is engineered for demanding industrial applications, prioritizing both efficiency and durability. Featuring an advanced direct injection system, it offers improved fuel economy and reduced emissions, making it a reliable choice for professional environments. The design emphasizes ease of maintenance, with accessible components and integrated usage tracking to ensure optimal operation and longevity.

Performance & Models

Available Models

- AM 140
- AM 125

Key Features

Direct Injection, Robust Construction, Hour Meter Included

Maintenance

Usage Tracking

Yes

Maintenance Access

Optimized for ease of maintenance and accessibility to key components
