

Industrial Internal Combustion Engine

This internal combustion engine is designed for heavy machinery and industrial applications. It features a multi-cylinder design with a robust oiling system, ensuring reliable and high-performance operation in demanding environments.

Overview

Industrial Performance Engine

This high-performance internal combustion engine is engineered specifically for demanding industrial applications and heavy machinery. Built with a robust cast iron block, it features a multi-cylinder design optimized for reliability and sustained power output. The integrated cooling and lubrication systems ensure efficient operation even under significant load, making it a dependable choice for industrial environments.

Technical Specifications

Engine Type

Internal Combustion • Multi-Cylinder • Diesel

Engine Block Material

Cast Iron

System Components

Fuel System Components

- High-pressure fuel pump
- Fuel injectors
- Fuel lines

Cooling & Lubrication

- Radiator fan
- Coolant hoses
- Oil filters
- Lubrication lines

Air Intake System

Integrated air intake with filtration system
