

Industrial Inverter Welding Machine

This robust welding machine is designed for industrial applications. It features a digital display and adjustable knobs for precise control of welding parameters.

Product Overview

Industrial-Grade Welding Power

The HM400 Inverter is a robust welding machine engineered specifically for demanding industrial applications. Featuring an intuitive digital display and high-precision adjustable controls, it allows operators to fine-tune welding parameters for optimal consistency. Its durable, ventilated orange housing ensures thermal stability and longevity in tough working environments.

Technical Specifications

Control Features

- Digital display
- Adjustable parameter knobs

Model Name	HM400
Technology	Inverter
Terminal Configuration	Positive Terminal, Negative Terminal

Design and Build

Housing Color

Orange

Cooling	Yes
