

Industrial Iron Blower

This iron blower is designed for high-wind and high-pressure applications. Its low-noise design and durable construction make it suitable for various industrial settings.

Overview

Industrial Medium-Pressure Centrifugal Blower

This industrial-grade iron blower is engineered for applications requiring high airflow, high pressure, and low operational noise. Featuring a durable iron housing and a precision-engineered impeller, it provides reliable performance in demanding environments such as factory smelting, small boilers, and industrial ventilation. The compact, lightweight design includes waterproof motor options, making it ideal for integration into space-constrained systems like kitchen equipment, drying machinery, and inflatable pressure setups.

Key Features

Key Features

High Air Volume, High Pressure, Low Noise, Corrosion Resistant, Compact Design, Waterproof Motor Options

Technical Specifications

Performance Data (DF Series)

Model	Power (W)	Air Volume (m ³ /h)	Max Pressure (m ³ /h)	Noise (dB)
DF-1	120	305	412	72
DF-2	180	405	450	75
DF-3	250	504	850	75
DF-4	370	660	860	76
DF-5	550	860	1020	76
DF-6	750	1200	1210	80
DF-7	1100	1900	1128	82

Rotation Speed

2800 r/min

Applications

Common Applications

- Factory Smelting
- Small Boilers
- Kitchen Ventilation Equipment
- Inflatable Pressure Equipment
- Plastic Machinery
- Printing Machinery
- Drying Equipment
- Underground Facilities
