

Industrial Irrigation Sprinkler Head

This industrial irrigation sprinkler head is designed for chemical applications. It features a durable metal construction, adjustable spray pattern, and threaded base for easy installation.

Overview

Industrial Irrigation Sprinkler Head

This industrial-grade sprinkler head is precision-engineered for demanding chemical applications and large-scale irrigation needs. Featuring a robust, durable metal construction, it ensures reliable performance in harsh environments. The design includes an adjustable spray pattern and a standardized threaded base, allowing for seamless integration and easy installation in both agricultural and industrial fluid distribution systems.

Technical Specifications

Model ID	DP-1
Production Year	2006

Construction & Design

Construction Material	Durable Metal
Installation Method	Threaded Base

Performance Features

Spray Pattern	Yes
---------------	-----

Applications

Primary Applications	Chemical Distribution, Agricultural Irrigation, Industrial Fluid Handling
----------------------	---
