

Industrial Junction Box with Cable Gland

This junction box is designed for electrical connections in industrial or outdoor environments. Its robust enclosure offers protection against various environmental factors and includes a cable gland.

Product Overview

Industrial Junction Box

This robust industrial junction box is designed to provide secure and weather-resistant electrical connections. It features a durable enclosure suitable for demanding industrial or outdoor environments. Equipped with an integrated cable gland, it ensures reliable cable strain relief and protection against environmental factors.

Technical Details

Recommended Use

- Industrial environments
- Outdoor installations

Model Identifier	PV-CY902
Terminal markings	A, B, PE
Enclosure Color	Black
