

Industrial Ladle Components

These are components for industrial ladles. They are designed for use in machinery applications.

Product Overview

Industrial Ladle Components

These industrial components are precision-engineered parts designed for use in ladle applications and heavy machinery environments. The collection includes durable, rectangular blocks suitable for various industrial assembly or replacement needs. Each component is clearly marked for easy identification and inventory management within manufacturing workflows.

Technical Specifications

Primary Application

Industrial Machinery • Ladle Components

Model Identifiers

418, 32871, RD3, TF1

Form Factor

Rectangular industrial block
