

Industrial Laser Cutting Machine

This laser cutting machine is designed for industrial applications requiring precision. It offers efficient and accurate cutting of various materials and incorporates a robust frame and advanced control system.

Overview

Industrial Precision Laser Cutting

The LC1313-200 is a high-precision laser cutting machine engineered specifically for demanding industrial applications. It delivers efficient and accurate cutting performance across a variety of materials, making it an ideal solution for manufacturing, rapid prototyping, and custom fabrication workflows. Built with a robust frame and an advanced control system, this machine ensures reliability and consistent quality in every cut.

Key Features

Safety & Control

Safety Interlocks, Advanced Control System, Robust Frame Construction

Technical Specifications

Recommended Applications

- Industrial Manufacturing
- Rapid Prototyping
- Custom Fabrication

Model Number

LC1313-200
