

Industrial Laundry Ironing Machine

This industrial ironing machine is designed for large-scale laundry operations. It features a robust feeding system, heated rollers for efficient ironing, and a precision folding mechanism suitable for handling various fabrics and linen types.

General Overview

Industrial Laundry Ironing Solution

This industrial ironing machine features a robust horizontal structure designed for high-volume laundry operations in hotels, hospitals, and commercial facilities. It offers versatile heating options including steam or electric, with configurable roller setups to match specific production speeds and fabric requirements. Equipped with advanced safety features like finger guards and emergency stops, it ensures reliable, efficient performance for bed sheets, towels, and various linens.

Certifications

CE, ISO 9001

Technical Specifications

Heating Methods

Steam Heating • Electrical Heating

Roller Configurations

- Single Roller
- Double Roller
- Triple Roller

Ironing Speed

8 m/min

Minimum Speed

40 m/min

Maximum Speed

Safety Systems

- Finger Guard
- Anti-curliness Device
- Emergency Stop Buttons
- Low Pressure Alarm
- Pneumatic Roller Lock
