

# Industrial LCD Display with Calibration Indicators

This LCD display features a rectangular screen with calibration or measurement indicators. It connects to a complex mechanism with cables, a control box, and linkages, suggesting precise positioning within equipment.

## Overview

### Industrial Precision Display

This industrial LCD display is engineered for high-precision environments, featuring integrated calibration markings along the screen for accurate measurement and positioning. The assembly includes a robust mechanical structure with a dedicated control box, making it suitable for complex machinery integration. Designed for durability and performance, this unit supports advanced actuation and monitoring tasks in demanding industrial settings.

## Technical Specifications

Display Type	Industrial LCD
Calibration Indicators	Yes

## Mechanical Assembly

### Included Components

- LCD Display Unit
- Black Control Box
- Mechanical Levers
- Linkage Mechanisms
- Mounting Bracket

Mounting Configuration	Bracket-mounted control system with linkage assembly
------------------------	--

## Application

Environment Suitability	Industrial, Precision Machinery, Actuation Systems
-------------------------	--
