

Industrial LCD Monitor JYL-18D

This ruggedized LCD monitor features a robust enclosure and high brightness display. It supports multiple video inputs, including VGA, DVI, and HDMI.

Product Overview

Industrial-Grade Display Solution

The JYL-18D is a ruggedized LCD monitor engineered specifically for demanding industrial environments. It features a robust enclosure, high brightness display, and wide viewing angles to ensure clarity in challenging conditions. Designed for versatility, it supports multiple video inputs including VGA, DVI, and HDMI, making it an ideal choice for process control and automation applications.

Technical Features

System Capabilities

- Superior system function
- Superior LCD function
- Strong environment adaptation
- Highly functional components
- Overall system test

Operational Highlights

Convenient operation, Fancy aspects

Connectivity

Supported Inputs

VGA, DVI, HDMI

Configuration

Optional Features

Touchscreen Functionality
