

Industrial Lever Paper Cutter

The industrial lever paper cutter is a robust and precise tool designed for efficiently cutting large stacks of paper, cardboard, and other sheet materials. Its heavy-duty construction ensures stability and durability for demanding industrial environments.

Overview

Industrial-Grade Precision Cutting

This industrial lever paper cutter is a robust and precise tool engineered for high-volume cutting of paper, cardboard, and various sheet materials. Built for demanding industrial environments, its heavy-duty construction ensures long-term durability and stability. The design features a long lever arm for significant mechanical advantage, reducing operator fatigue while maintaining consistent cutting power.

Technical Specifications

Cutting Capabilities

- Paper stacks
- Cardboard
- Sheet materials

Operational Features

Calibrated table surface, Adjustable guides, High-volume capacity

Safety & Design

Safety Mechanisms

Blade guard • Secure clamping mechanism

Applications

Suitable Environments

- Print shops
- Packaging facilities
- Industrial workshops
