

Industrial Long Arm Sewing Machine for Heavy Fabrics

This heavy-duty industrial sewing machine is designed for manufacturing garments, shoes, and accessories. It features a long arm for handling large or bulky materials and a robust drive system for consistent stitching.

Product Overview

Heavy-Duty Industrial Performance

This industrial long-arm sewing machine is engineered specifically for high-volume manufacturing of heavy fabrics, including leather, canvas, and specialized garment materials. Its extended arm design provides the necessary clearance for bulky or large-format items, while the robust drive system ensures consistent, high-precision stitching. Built for demanding industrial environments, this machine offers reliable performance and essential adjustments to maintain quality across continuous production cycles.

Technical Capabilities

Key Features

- Long arm design for large materials
- Robust drive system
- Adjustable stitch length
- Adjustable tension settings

Machine Type	Industrial Long Arm Sewing Machine
Suitable Materials	Leather, Canvas, Heavy Fabrics

Performance Metrics

Production Grade

High-Volume Production • Industrial Grade
