

Industrial Machinery Support Frame

This widened stand frame is designed for industrial machinery, offering a stable base. It is constructed from light-colored metal and features adjustable height settings and a foot pedal platform.

Product Overview

Industrial Machinery Support Frame

This widened stand frame is engineered to provide a robust and stable foundation for industrial machinery, such as sewing equipment. Constructed from durable, light-colored metal, the frame is designed to minimize vibration during operation, thereby enhancing stability and operator comfort. Featuring adjustable height settings and an integrated foot pedal platform, it offers a versatile solution for varying production requirements.

Physical Attributes

Model Number	GK-2
Frame Type	Widened Stand
Material	Industrial Metal

Features

Intended Use

- Sewing Machines
- Industrial Machinery Support

Key Features

Adjustable Height, Vibration Reduction, Foot Pedal Platform, Heavy-Duty Design
