

Industrial Machinery Wheel with Mounting Bracket

This heavy-duty, cast metal wheel is designed for industrial machinery applications. The wheel incorporates a robust construction with a grooved outer edge for track or rail guidance.

Overview

Industrial Machinery Wheel with Mounting Bracket

This heavy-duty, cast metal wheel is engineered for demanding industrial machinery applications, including construction and agricultural equipment. It features a robust design with a grooved outer edge specifically crafted for reliable track or rail guidance. The integrated mounting bracket includes a central circular recess and Y-shaped reinforcement, ensuring enhanced stability and superior load-bearing capacity for long-term operational performance.

Technical Specifications

Material	Cast Metal
Design Features	Grooved Edge, Track Guided, Reinforced Bracket, Weight-Reduction Cutouts
Mounting Configuration	Multi-aperture bracket with central recess

Applications

Suitable Industries

- Construction Equipment
- Agricultural Machinery
- Heavy Industrial Applications
