

Industrial Magnetizer Equipment for Magnetic Materials

Industrial magnetizer equipment is designed for charging and magnetizing various magnetic materials. It features robust construction, digital control panels, and multiple output configurations.

Overview

Industrial Magnetizer Equipment

This industrial-grade magnetizer is designed for the efficient charging and magnetization of various magnetic materials, including motors and loudspeakers. Engineered with advanced technology, it offers a wide range of models from low to high voltage to suit diverse industrial applications. The equipment features robust construction and specialized cooling systems, ensuring long performance life and the capability for continuous operation.

Technical Specifications

Compatible Fixtures

- Standard solenoid fixtures
- Complex multi-pole
- Radial arrangements
- Motor internal/external
- Loudspeaker magnetization

Voltage Range	Low voltage to high voltage series
Circulation Time	1 to 45 seconds
Cooling Methods	Forced Air, Liquid (Water), Liquid (Oil)

Logistics & Services

Shipping Methods

Method	Estimated Time	Note
Express (FedEx, UPS, DHL, etc.)	7-10 days	Door to door, expensive
Air Transportation	8-12 days	Requires airport pickup
Sea Transportation	Variable	Slow, requires port pickup, cost-effective

Packaging

Wooden cases
