Product Overview

Industrial Magnetizer System

This industrial-grade magnetizer is designed for precise magnetic material charging, suitable for manufacturing, research, and maintenance applications. The system features a robust, dual-cabinet configuration with integrated digital monitoring, intuitive control switches, and essential safety mechanisms. Mounted on heavy-duty wheels, the unit provides mobility within industrial environments while delivering reliable, high-performance operation.

Technical Specifications

Cooling Systems

- Forced Air Cooling
- Liquid Cooling (Water)
- Liquid Cooling (Oil)

Supported Series

MC Pulse (Low Voltage), MCG High Voltage Pulse, DCL Permanent Electromagnetic

Circulation Time

1 to 45 seconds

Fixture Capabilities

Available Fixtures

- Standard Solenoid
- Complex Multi-pole
- Radial
- Special Arrangements

Logistics & Services

Shipping Methods

Method	Speed	Cost Profile
Express (FedEx/DHL/UPS)	7-10 Days	High
Air Freight	8-12 Days	Medium
Sea Freight	Slow	Low

Service Highlights

Sample Available • Spare Parts Supply • Custom Branding • Custom Packaging

Packaging

Wooden cases
