

Industrial Manufacturing Mould

This industrial mould is designed for high-precision manufacturing processes. It features a cylindrical body with multiple ports and a toothed wheel mechanism for precise adjustments.

Product Overview

High-Precision Industrial Mould

This industrial mould is engineered for high-precision manufacturing processes, featuring a robust cylindrical body designed for durability and consistency. It is mounted on a heavy-duty adjustable stand equipped with wheels for mobility and adjustable feet for precise leveling. The integrated toothed wheel mechanism allows for fine-tuned adjustments, ensuring optimal performance in demanding industrial environments.

Technical Design

| | |
|----------------------|---------------|
| Body Configuration | Cylindrical |
| Adjustment Mechanism | Toothed wheel |

Construction & Mobility

| | |
|---------------------|---|
| Primary Application | High-Precision Manufacturing |
| Stand Construction | Heavy-duty metal beams |
| Mobility Features | Wheeled base, Adjustable feet, Leveling support |
