

Industrial Material Cutting and Bending Machine

This heavy-duty machine is designed for industrial material processing. It utilizes a large circular saw blade on a gantry system to ensure precise and efficient cutting and bending.

Product Overview

Industrial Cutting and Bending Solution

This heavy-duty machine is engineered for high-precision industrial applications, combining cutting and folding capabilities in a single unit. Designed for efficiency, it features a robust gantry system equipped with a large circular saw blade, making it ideal for processing large slabs of stone or metal. With integrated automated controls and enhanced safety features, this system provides a reliable solution for demanding manufacturing environments.

Technical Specifications

Suitable Materials

- Stone Slabs
- Metal Sheets

Operational Features

Automated Operation • Gantry System • Heavy-Duty • Safety Integrated

Model Number

LYMG-3000

Machine Type

Cutting Machine, Bending Machine, Industrial
