

Industrial Material Hopper Feeder

This industrial material hopper feeder is designed for storing and dispensing raw materials. It features a wide upper section tapering to a narrower outlet, supported by a wheeled base for mobility.

Overview

Industrial Material Hopper Feeder

This industrial material hopper feeder is a robust component designed for efficient material handling in plastic and rubber processing environments. It features a heavy-gauge metal construction with a wide-to-narrow tapered design, ensuring smooth material flow and consistent dispensing. Equipped with a wheeled base for mobility, this unit offers versatility and ease of integration into existing production lines.

Physical Characteristics

Construction Material	Heavy-gauge metal
Mobility	Yes
Design	Tapered hopper

Industrial Application

Compatible Industries	Plastic Processing, Rubber Manufacturing
Primary Function	Material storage and dispensing
