Overview

Industrial Material Sizing Screen

The CS(B) circular vibrating screen is engineered for the efficient classification and screening of coal and similar industrial materials. Featuring a fully enclosed screen box design, this unit effectively prevents dust pollution while solving common operational challenges such as wet material accumulation on the bottom plate. It is a robust, heavy-duty solution designed for reliable performance in demanding industrial environments.

Technical Specifications

Available Specifications

- CS0918B
- CS1224B
- CS1530B
- CS1830B
- CS2130B
- CS2430B
- Additional models available

Screen Plate Options

Weaving, Punching, Cutting

Key Features

Operational Advantages

Dust-free operation • Anti-clogging design • Heavy-duty construction • Efficient material separation
