

# Industrial Mesh Container Trolley

This industrial trolley is designed for efficient material handling and storage. The container is constructed from durable metal mesh and equipped with heavy-duty casters for smooth maneuverability.

## Product Overview

### Industrial Mesh Container Trolley

This robust industrial mesh container trolley is specifically engineered for efficient material handling in textile, laundry, food, and service industries. It features a durable metal mesh construction with a horizontal two-hinged half-door design, allowing for easy access and handling of contents. Designed for versatility and space efficiency, this trolley is collapsible when not in use and provides a secure, visible solution for warehouse logistics and consignment management.

## Key Features

### Operational Advantages

- Collapsible design for space-saving storage
- Horizontal 2-hinged half door for easy access
- Durable metal mesh construction
- Suitable for textile, laundry, and food industries
- Designed for secure consignment handling

## Technical Specifications

### Suitable Industries

Textile • Laundry • Food Industry • Services

### Surface Finish

Galvanizing, Powder Coating

### Mobility

Heavy-duty casters
