

Industrial Metal Bar Bender and Cutter

This machine is designed for cutting and bending metal bars and rods. It features adjustable height settings and is mounted on wheels for mobility.

Overview

Industrial Metal Bar Bender and Cutter

This heavy-duty machine is engineered for high-precision industrial metal manipulation, specifically designed for bending and cutting metal bars and rods. Featuring a robust construction with a durable work surface, it incorporates advanced circular bending mechanisms and linear guides to ensure consistent results. Built for mobility and adaptability, the unit includes adjustable height settings and heavy-duty wheels, making it a versatile addition to any fabrication workshop.

Design & Construction

Key Design Features	Heavy-duty construction, Circular bending mechanism, Linear guides, Adjustable height, Mobile design
Mobility	Mounted on wheels

Application

Primary Functions

- Metal bar cutting
- Metal rod bending
- Metal rod cutting
- Material folding
