

Industrial Metal Cutting Machine

This heavy-duty machine is designed for cutting various metal types with accuracy and consistency. Its robust build and integrated control panel ensure efficient operation in industrial applications.

Overview

Industrial Metal Cutting Solution

This heavy-duty metallic processing machine is engineered for demanding industrial environments. It combines a robust, durable build with high-precision cutting capabilities to ensure consistent results across various metal types. Designed for operational efficiency, it features an integrated control panel that streamlines workflow for professional applications.

Technical Specifications

Primary Application

Industrial • Metal Cutting

Model Identifier

GS325X45/100

Construction

Heavy-duty
