

Industrial Metal Cutting Machine

This industrial metal cutting machine is designed for precise and efficient processing of metallic materials. It features a robust construction with a red base cabinet, a cutting head with a yellow safety guard, and a hand-operated wheel for adjustments.

Overview

Industrial Precision Cutting

This industrial metal cutting machine is engineered for high-precision and efficient processing of various metallic materials. Featuring a robust, heavy-duty construction, it is built to withstand demanding workshop and manufacturing environments. The unit includes intuitive manual adjustment controls and a foot-pedal activation system, ensuring both safety and operational accuracy for professional users.

Technical Specifications

Control Interface

- Hand-operated adjustment wheel
- Cabinet-mounted operational settings
- Foot pedal control

Construction

Heavy-duty industrial cabinet base

Safety Features

Yellow safety guard, Foot pedal activation

Application

Ideal For

Workshops • Manufacturing • Metal Fabrication
