

# Industrial Metal Forming Wheel

This heavy-duty metal forming wheel is designed for industrial applications. Its robust construction includes multiple bolt holes for secure mounting and a surface finished with a protective coating to resist corrosion and wear.

## Product Overview

### Industrial Metal Forming Wheel

This heavy-duty metal forming wheel is engineered for demanding industrial applications requiring precision and resilience. Its robust construction ensures reliable performance under significant stress, while the specialized surface coating provides essential protection against corrosion and wear. Designed for secure and stable operation, this component is an ideal solution for heavy-duty metallic processing machinery.

## Technical Specifications

Application	Industrial Metal Forming
Construction	Heavy-duty
Mounting	Multiple bolt holes, Secure mounting

## Surface Treatment

Surface Coating  
Corrosion resistant • Wear resistant
