

Industrial Metal Grating for Flooring

This metal grating is suitable for flooring, platforms, or drainage covers in demanding environments. The grating consists of parallel load-bearing bars joined by perpendicular crossbars, creating a grid pattern.

Product Overview

Industrial-Grade Flooring Solution

This industrial metal grating is engineered for high-performance flooring, platforms, and drainage applications in demanding environments. Featuring a robust grid design with load-bearing bars and reinforced crossbars, it offers exceptional structural integrity. The crossbars are specifically treated to provide superior slip resistance, ensuring safety in industrial settings.

Technical Specifications

Common Applications

- Industrial flooring
- Walkway platforms
- Drainage covers
- Construction settings

Construction

Parallel load-bearing bars with perpendicular crossbars

Surface Design

Slip-resistant, Twisted crossbars, Grid pattern
