Product Overview

Industrial Metal Press Former

This industrial-grade press forming system is engineered for the high-precision manufacturing of straight seam pipes. The modular production line integrates pre-bending, press forming, tack welding, and tube expanding to deliver robust performance in heavy-duty environments. It is an ideal solution for large-scale operations in oil and gas transport, bridge construction, ocean drilling, and critical infrastructure projects.

Applications

Supported Industries

Oil & Gas, Ocean Drilling, Steel Structure, Nuclear Power, Bridge Construction, Architecture, Telecommunications, Electricity

System Components

Production Line Modules

- Pre-bender
- Press Former
- Tack Welder
- Tube Expanding Machine

Compatible Pipe Types

- Oil Pipe
- Station Steel Pipe
- Thick Structure Pipe
- Stainless Steel Pipe
