

Industrial Metal Shearing Machine

This industrial metal shearing machine is designed for cutting sheet metal to specific dimensions. It features a robust frame, a cutting blade mechanism, and a foot pedal control for operation.

Overview

Industrial Metal Shearing Machine

This industrial metal shearing machine is engineered for precision cutting of sheet metal to specific dimensions. Built with a robust frame, it ensures stability and durability in demanding manufacturing and fabrication environments. The unit features integrated safety systems, including a protective front guard and accessible emergency stop buttons, to ensure operator security during use.

Technical Specifications

Typical Applications

- Manufacturing
- Metal Fabrication

Operation Control	Foot pedal control
Safety Features	Front Guard, Emergency Stop
