

Industrial Metallurgy Machinery

This heavy-duty machinery is designed for industrial metallurgy applications. The equipment is engineered for demanding tasks within the mining and metallurgical sectors.

Overview

Industrial Metallurgy Machinery

This heavy-duty metallurgy machinery is specifically engineered for demanding industrial tasks within the mining and metallurgical sectors. It features a robust construction designed for high-performance operation in challenging environments. The equipment is mounted on a multi-axle platform, ensuring stability during both transport and active industrial operation.

Technical Specifications

Model Series	qINYE
Performance Rating	4

Operational Features

Construction Type	Heavy-duty • Industrial Grade
Suitable Sectors	Mining, Metallurgy, Heavy Industry
Mobility Configuration	Multi-axle platform
