

Industrial Metering Pump for Chemical Dosing

This industrial metering pump is designed for precise chemical dosing applications. It features a durable plastic pump head and adjustable control knob within a robust, ventilated housing.

Product Overview

Industrial Metering Pump

This industrial metering pump is engineered for precise chemical dosing and continuous operation in demanding environments. Featuring a robust housing with integrated ventilation fins, the unit is built to maintain reliability during extended use. The system includes an intuitive control knob, allowing for accurate adjustments of flow rates to meet specific process requirements.

Technical Specifications

Pump Type	Industrial Metering Pump
Primary Application	Chemical Dosing, Industrial Processing

Design & Build

Construction Features

- Robust industrial housing
- Integrated ventilation fins for cooling
- Durable plastic pump head
- Manual control knob interface

Color

Green • Black
