

Industrial MMA Welding Machine

This is a heavy-duty industrial welding machine designed for professional welding applications. The machine is equipped with advanced technology for stable arc performance, efficient power utilization, an integrated cooling system, and safety features.

Product Overview

Industrial MMA Welding Power Source

This heavy-duty industrial welding machine is engineered for professional-grade welding applications, providing exceptional output capacity for the most demanding tasks. Built with a robust construction, it integrates advanced technology to ensure highly stable arc performance and superior power efficiency. Safety and reliability are at the core of its design, featuring an integrated cooling system and comprehensive protection mechanisms for consistent, high-performance operation.

Technical Specifications

Key Performance Metrics

400 A

Max Output Current

Model Identifier	ZX7-400I
Supported Welding Processes	MMA

Features

Construction and Safety

- Robust industrial-grade construction
- Advanced stable arc technology
- High-efficiency power utilization
- Integrated active cooling system
- Enhanced user safety protection features
