

Industrial Motor Magnetic Starter

This magnetic starter is designed for reliable starting and stopping of electric motors. It features a robust enclosure, overload protection, and easy installation for various industrial applications.

Product Overview

Industrial Motor Control Solution

This industrial motor magnetic starter is engineered for the reliable starting and stopping of electric motors in demanding industrial environments. It features a robust enclosure designed for durability and longevity, alongside integrated overload protection to safeguard your equipment. With a focus on easy installation and operational efficiency, this starter is an ideal choice for a variety of industrial motor control applications.

Model Series

MS-N, MS-K

Technical Features

Key Features

- Robust protective enclosure
- Integrated overload protection
- Simplified installation process
- Reliable motor start/stop control

Application Suitability

Industrial Motor Control • Electric Motor Protection
