

Industrial Multi-Cavity Injection Mould

This precision-engineered mould is designed for industrial manufacturing processes. It features a multi-cavity configuration and is constructed from high-grade steel for durability.

Overview

Precision Industrial Moulding Solution

This industrial multi-cavity injection mould is precision-engineered to support high-volume manufacturing processes. Designed with a circular injection point pattern, it ensures uniform material distribution across all cavities for consistent quality. Constructed from high-grade steel, the mould offers exceptional durability and longevity, featuring robust clamping and alignment mechanisms for accurate part replication.

Technical Specifications

Material Construction

High-grade Steel

Design Configuration

Multi-cavity with circular injection point pattern

Suitability

High-volume Production, Plastic Components, Composite Components

Key Features

Performance Metrics

1 High

Alignment Precision
