

Industrial Multi-Cylinder Engine Assembly

This heavy-duty engine assembly is designed for industrial or machinery applications. The engine features a multi-cylinder configuration, a belt-driven cooling fan with red blades, and a robust construction.

Overview

Industrial Multi-Cylinder Engine Assembly

This heavy-duty multi-cylinder engine assembly is engineered for demanding industrial and machinery applications. Featuring a robust construction and a high-visibility yellow finish, it is designed for durability and consistent performance in challenging environments. The unit comes pre-mounted on a stable support stand, ensuring ease of integration into existing systems.

Technical Specifications

Cooling System	Belt-driven fan
Engine Configuration	Multi-cylinder

Design & Construction

Finish Color	High-Visibility Yellow
Mounting	Integrated support stand with multiple legs

Application Features

Intended Use	Industrial Machinery, Heavy-Duty Applications
