

Industrial Multi-Needle Stitching Machine

This industrial textile machine is designed for high-volume apparel production. It features a multi-needle configuration for creating intricate stitch patterns and a robust frame for stability.

Overview

High-Efficiency Industrial Stitching

This industrial-grade multi-needle stitching machine is engineered for high-volume apparel production environments. Designed for precision and stability, it features a robust frame capable of handling intensive daily use in demanding manufacturing settings. The multi-needle configuration allows for complex stitch patterns while multiple spool holders ensure uninterrupted, continuous operation.

Technical Specifications

Model Identifier	BS-1212PQ
Machine Capabilities	Multi-Needle Stitching, High-Volume Apparel Production, Complex Patterning

Operational Features

Performance Metrics

12 needles
Needle Count
