

Industrial Nut and Seed Roasting Machine

This drum roasting machine is suitable for roasting various beans, nuts, and seeds. It utilizes a rotary cage and hot air with automatic temperature control to ensure uniform heating and consistent quality.

ADDITIONAL IMAGES

Overview

The drum roasting system features a continuous processing design with a feeding system, roasting chamber, and discharge mechanism.

Industrial Nut and Seed Roasting Solution

This industrial drum roasting machine is engineered for high-capacity, continuous processing of a wide variety of nuts and seeds, including peanuts, sesame seeds, almonds, walnuts, and chestnuts. Utilizing electric heating tubes and a rotary cage design, the machine ensures uniform heat distribution through conduction and radiation. With automatic temperature control and an integrated propulsion system, it delivers consistent baking quality and efficiency for commercial food processing applications.

Technical Specifications

Heat Source	Electric heating tube
Roasting Method	Rotary cage with hot air circulation
Temperature Control	Yes

Applications

Compatible Products	Peanuts, Sesame Seeds, Broad Beans, Soybeans, Almonds, Chestnuts, Walnuts, Hazelnuts, Melon Seeds
---------------------	---

Service & Support

After-Sales Service

The machine comes with a standard one-year warranty and lifelong maintenance support. We provide free replacement parts for defects caused by design issues within the warranty period. Technical support is available for all operational inquiries.

Warranty Period	1 Year
