

Industrial Nut Butter Grinding Machine

This colloid mill is designed for grinding nut butters, including peanut, sesame, walnut and almond. The machine uses high-speed relative movement between a fixed gear and a moving gear to process raw materials.

Product Overview

Industrial Nut Butter Grinding Machine

This high-efficiency colloid mill is engineered for the industrial processing of various nut butters, including peanut, sesame, walnut, and almond pastes. Utilizing a high-speed relative correlation between fixed and drive gears, it ensures consistent texture and smooth output. Designed for commercial food processing, the machine features high-strength stainless steel construction in all contact areas, providing excellent corrosion and abrasion resistance for hygienic, contamination-free production.

Technical Specifications

Suitable Materials

- Peanuts
- Sesame seeds
- Walnuts
- Almonds

Material Construction

High-strength Stainless Steel, Corrosion Resistant, Abrasion Resistant

Grinding Mechanism

High-speed relative correlation between fixed and drive gears

Service & Support

After-Sales Support

The machine includes a one-year guarantee period with lifelong maintenance support. We provide free replacement parts for defects caused by design issues within the warranty period. Technical support is available for all inquiries, and user responsibility applies to damages caused by non-design factors.

Warranty Period

1 Year
