Product Overview

Industrial Performance & Efficiency

This RY series burner is a high-performance dual-purpose system compatible with both diesel and heavy oil, making it an ideal solution for asphalt plants and various drying processes. Engineered for reliability, the unit features a lightweight, modular design that is easy to install and maintain, while meeting strict environmental standards for low-noise operation and emissions. With adjustable air volume and combustion heads, operators can achieve optimal combustion effects across a wide range of industrial heating applications.

Technical Specifications

Industrial oil burner unit featuring a cylindrical combustion chamber and twin-blower assembly, mounted on a mobile platform.

Output Power Range

3540 kW

Min Output Power

14750 kW

Max Output Power

Model Range

RY-300CH ~ RY-1250CH

Applicable Asphalt Plant Capacity

25-40 tonnes/h ~ 140-170 tonnes/h

Features & Compatibility

Key Benefits

- Lightweight and easy installation
- Low operating noise
- Environmentally compliant emissions
- Adjustable combustion head for optimal effects
- European quality standards

Compatible Fuels

Diesel, Heavy Oil
