

Industrial Overhead Crane System

This heavy-duty overhead crane system is designed for industrial lifting applications. It features a robust steel structure with a motorized trolley and hoist for precise load positioning.

Overview

Industrial Overhead Crane System

This heavy-duty overhead crane system is engineered for demanding industrial lifting applications, providing a robust solution for material handling. Featuring a durable steel structure with a wide-spanning horizontal beam, it is designed to optimize workflow in manufacturing plants, warehouses, and construction sites. The system includes a motorized trolley and hoist, ensuring precise load positioning and operational safety for professional environments.

Technical Specifications

Core Components

- Robust steel structure
- Horizontal beam
- Motorized trolley
- Hoist

System Type	Overhead Crane System
-------------	-----------------------

Applications

Suitable Environments	Manufacturing Plants, Warehouses, Construction Sites
-----------------------	--

Compliance & Safety

Safety Compliance

Industry Standard Compliant
