

Industrial Overlock Sewing Machine for Apparel and Shoe Manufacturing

This industrial overlock sewing machine is designed for garment, shoe, and accessory manufacturing. It features precision components for accurate stitching and efficient operation in apparel and textile applications, suitable for various fabric types and seam finishes.

Overview

Industrial Overlock Sewing Machine

This industrial overlock sewing machine is engineered for high-volume manufacturing environments, specifically tailored for apparel, footwear, and accessory production. It features a robust construction designed to withstand continuous operation while delivering professional, durable seam finishes. With adjustable settings and precision-engineered components, this machine ensures consistent stitch quality across a wide variety of fabric types and textile applications.

Technical Specifications

Key Features

- Multi-thread spool capability
- Adjustable sewing settings
- High-volume production design
- Precision stitching components
- Durable industrial construction

Primary Applications

Apparel Manufacturing, Shoe Production, Accessory Manufacturing, Textile Processing

Performance

Performance Highlights

1 Industrial
