

Industrial Overlock Sewing Machine for Edge Finishing

This overlock sewing machine is designed for creating finished edges on fabric. Its robust design ensures durability and consistent performance in demanding sewing environments.

Product Overview

Industrial Edge Finishing Solution

The ACER7434 is a robust industrial overlock sewing machine engineered for high-performance edge finishing. Designed for demanding sewing environments, it features precise tension control and multiple thread guides to ensure consistent, professional-grade results across various fabric types. This machine combines sturdy construction with reliable operation, making it an essential tool for efficient garment and textile production.

Technical Specifications

Application

Industrial • Edge Finishing • Overlocking

Key Features

- Multiple thread guides
- Precision tension control dials
- Sturdy industrial construction
- High-durability design

Model Number

ACER7434
